

1 Dataset

1,497 frames acquired

HUVEC 1,085 · SKOV-3 412

–134 excluded at blind triage (9.0%)

1,363 retained · 150 closed wounds

2 Leakage-free partition

265 acquisition units

split by unit, never by image

train 932 · val 197 · test 234

0 units span two partitions

3 Benchmark

25 runs: 5 configurations × 5 seeds

black vs white padding, one variable

U-Net comparator, 5 seeds

held-out test, n = 234

4 Reference standard

223 test frames measured

77 adequate · 123 corrected · 23 invalid

blinded repeat on 15 frames

187 closure measurements

5 Agreement

97 paired observations

45 acquisition series

Lin's CCC 0.803, Bland-Altman

cluster bootstrap, per seed

6 Deployed tool

two configurations, M and S

public weights, no external API

operating point 0.80
